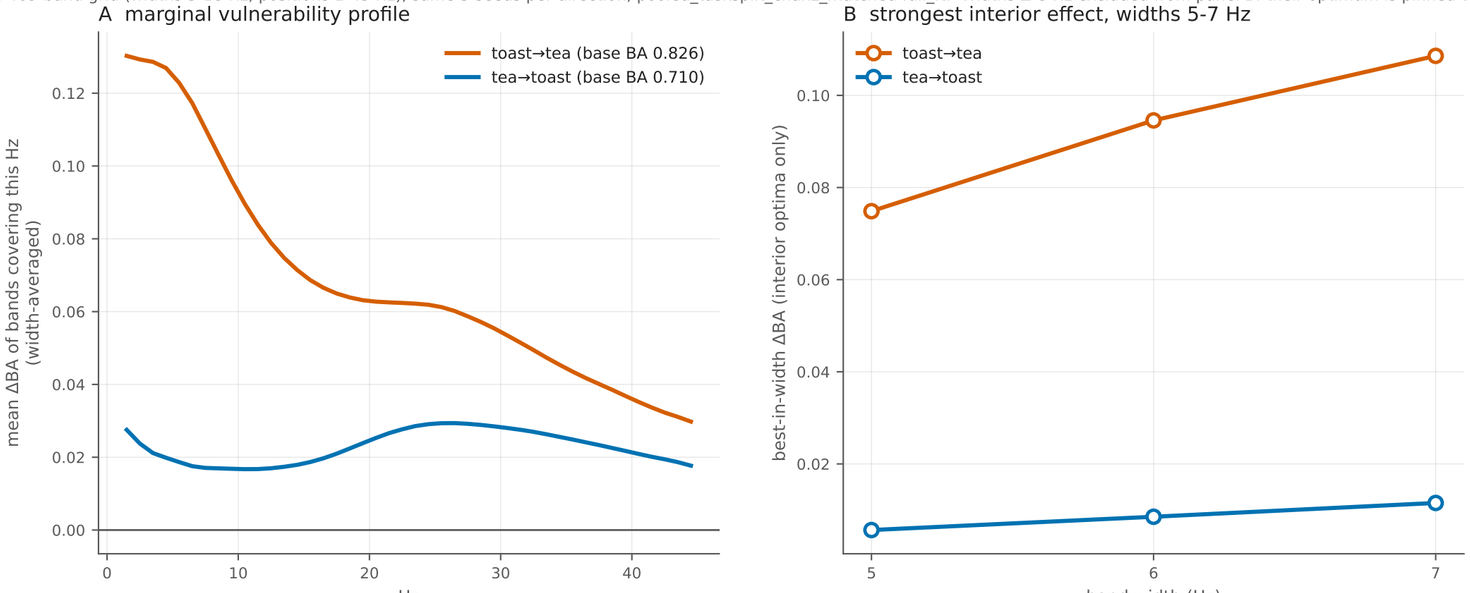
toast→tea vs tea→toast — multi-width band-stop sweep


Same 469-band grid (widths 5-18 Hz), same 5 seeds per direction, pooled_tasksplit_chanz_matched full_ft. Widths ≥ 8 Hz excluded from panel B: their optimum is pinned to the 1 Hz sweep edge in at least one direction (edge-truncation warning, see each direction's own report) and is not interpretable.
